**Re: EPA June 24, 2004 Request for Information ("RFI")
Administrative Order on Consent for Corrective Action ("Order")
Docket Number 1091-11-20-3008(h) Former Rhone-Poulenc East Marginal Way
Facility Container Properties L.L.C./Rhodia, Inc.**

Dear Ms. Brown:

The Respondents appreciate the extension granted by EPA in its August 11, 2004 letter regarding the above referenced RFI. In response to this RFI, attached herewith are three copies of the follow reports:

1. CH2M Hill, 1976. Industrial Waste Disposal Study for VBLS, April 29, 1976
2. Dames & Moore, 1981. Report of Site Conditions and Waste Characterization for Monsanto Company, July 2, 1981
3. Dames & Moore, 1986. Phase II, Site Screening Investigation, October 1986

In response to the RFI, Container Properties and Rhodia/Rhone Poulenc made and exhaustive search through our archives for the requested documents. We also directed the authors of the requested documents to search their archives as well. Despite this diligent effort, we were unable to locate the fourth document requested (Dames & Moore, 1987. Report on Pipeline Leak Investigation, February 4, 1987). It is our belief that the document no longer exists. Based on the transmittal of the attached documents, combined with our determination that the fourth document no longer exists, the Respondents believe that we've responded fully to EPA's June 24, 2004 RFI.

Ms. Christy Brown
